BI CASE | SOURCE TO CONTRACT

You can't improve what nobody measures.

How I built, from scratch, the SLA for a Source to Contract tower across 6 operations and 9 countries.

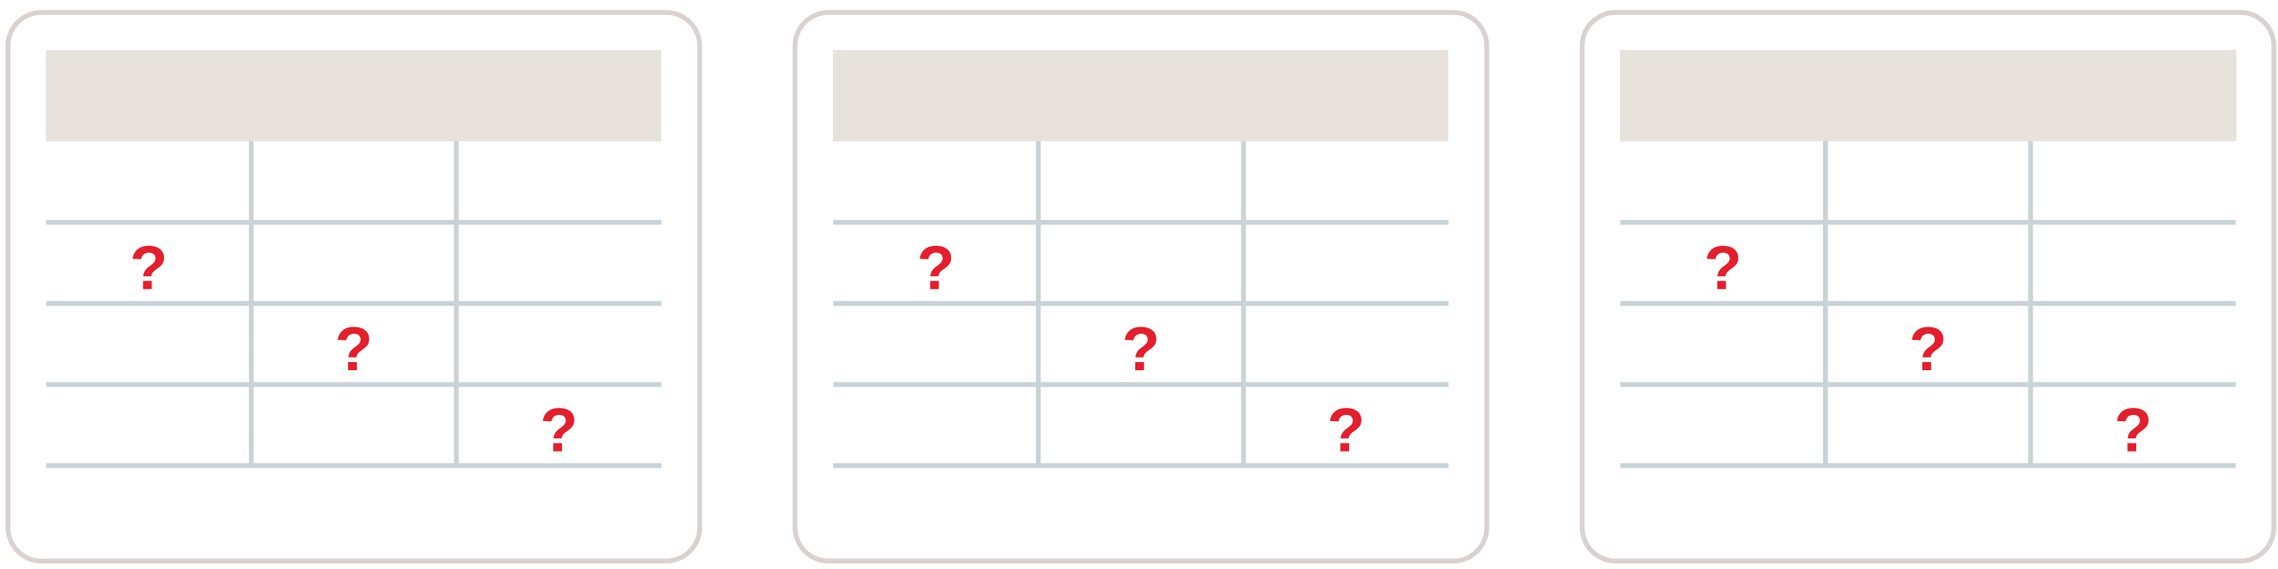
Daniel Garcia Costa

Data & BI Analyst | Power BI DAX SQL

THE STARTING POINT

A new project, with no indicators.

Tracking was done in spreadsheets. Nobody measured lead time per stage, so nobody knew where the process got stuck.



No target, no measurement.

Daniel Garcia Costa
Data & BI Analyst | Power BI DAX SQL

THE CHALLENGE

6 operations. 9 countries. One yardstick.

6
operations

9
countries

1
single criterion

Each operation needed to see its own result, and management needed to compare them all with the same criterion.

Daniel Garcia Costa
Data & BI Analyst | Power BI DAX SQL

WHAT I BUILT

An SLA dashboard with three filters and a traffic light per owner.

Home | Vol. Purchases | Work in Progress | Cycle Time | Analytics | KPIs | SLA | Indicators

Period: 09/2026

View: Summary

Country: All

Clear Filters

	Target (days)					% compliance			
	A	B	C	T	Exp.	Owner A	Owner B	Owner C	Cycle
Process 1	4	2	1	7	90%	72.4%	88.6%	94.1%	69.8%
Process 2	2	-	1	3	90%	96.2%	-	91.5%	92.9%
Process 3	3	-	-	5	90%	81.4%	93.0%	96.9%	87.2%
Process 4	-	-	-	-	90%	40.7%	55.3%	79.0%	62.3%
Process 5	3	1	2	6	90%	95.6%	100.0%	92.2%	96.7%

90% or more | 85% to 90% | below 85%

*Targets in days, per owner and total

SLA period | Summary or detailed view | Country measured

LEGEND

A, B, C: owners of each stage (e.g. operations, supplier, client)

T (Cycle): total process time, start to finish

Daniel Garcia Costa

Data & BI Analyst | Power BI DAX SQL

BEHIND THE TRAFFIC LIGHT

The volume behind each percentage.

Home | Vol. Purchases | Work in Progress | Cycle Time | Analytics | KPIs | SLA | Indicators

Period: 09/2026

View: Summary

Country: All

Clear Filters

	Target (days)					Within target (qty.)			
	A	B	C	T	Volume	Owner A	Owner B	Owner C	Cycle
Process 1	4	2	1	7	1,240	898	1,099	1,167	866
Process 2	2	-	1	3	520	500	-	476	483
Process 3	3	-	-	5	860	700	800	833	750
Process 4	-	-	-	-	300	122	166	237	187
Process 5	3	1	2	6	450	430	450	415	435

Requests completed within the lead-time target, in the month.

Same screen, another tab: how many requests were within the target. The traffic-light percentage comes from these numbers.

A, B, C: owners | T: total process time

Daniel Garcia Costa
Data & BI Analyst | Power BI DAX SQL

HOW THE SLA WORKS

Each process has a target lead time, in days.

Per owner and for the total cycle. The dashboard compares compliance against the expected 90%.

$$\%\ \text{compliance} = \frac{\text{(total - late)}}{\text{total}}$$

Illustrative example: Process 1, Owner A = (1,240 - 342) / 1,240 = 72.4%

90% or more	on target
85% to 90%	attention
Below 85%	critical

Daniel Garcia Costa
Data & BI Analyst | Power BI DAX SQL

WHERE THE BOTTLENECK IS

From the process to the stage that slips.

Summary view

Fictitious data

	A	B	C	Cycle
Spot buy	74.0%	88.0%	96.0%	71.0%
Contracts	96.2%	-	91.5%	92.8%
Support	81.0%	94.0%	97.0%	89.0%

Detailed view

Fictitious data

	A	B	C	Cycle
Spot buy				
Materials	66.0%	85.0%	95.0%	62.0%
Services	82.0%	91.0%	97.0%	80.0%
Support				
Level 1	92.0%	96.0%	98.0%	94.0%

Management sees at which stage, and with which owner, the deadline is missed.

HOW IT WAS BUILT

Rules set by operations. Built by me.

Defined by the operations

The target lead times (goal in days) for each process and each owner.

Done by me

- **SLA calculation rule**
- **Data modeling**
- **DAX measures and traffic light**
- **Data prep with Power Query**
- **Dashboard layout**

Power BI | DAX | Power Query | Modeling

Daniel Garcia Costa
Data & BI Analyst | Power BI DAX SQL

RESULT

Everyone looking at the same number.

100+

people, incl. managers and operations staff

6

operations measured by the same yardstick

9

countries tracked

Standardized indicators replacing spreadsheets.

LESSON

A good indicator doesn't just measure lead time. It shows who can act.
